## HARDEST QUESTIONS

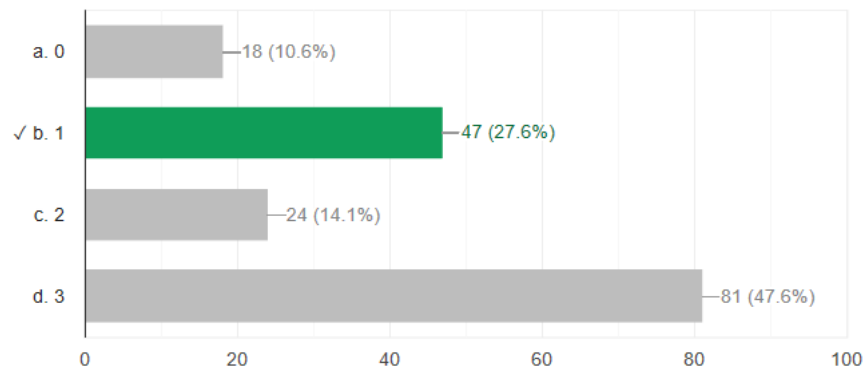

(ranked hardest to easiest with less than 75% correct)

Rank	Question #	Correct Responses	Percentage Correct
1	13	47 / 170	27.60%
2	16	53 / 170	31.20%
3	10	81 / 171	47.40%
4	18	85 / 171	49.70%
5	8	136 / 182	74.70%

### Detailed Breakdown of Hardest Questions

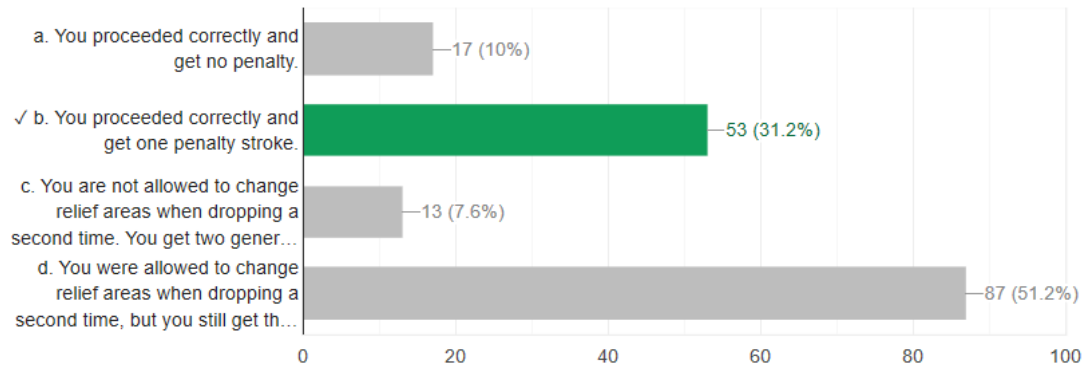

13. In stroke play, with Model Local Rule E-12 in effect, your ball is in an animal hole in a bunker and you decide to take back-on-the-line relief outside the bunker. You place a tee in the ground to create a reference point on the reference line and drop a ball in the relief area. The dropped ball first touches part of the ground in the general area in your relief area, but it then bounces and accidentally hits your foot that is outside the relief area. After hitting your foot, the ball rolls and comes to rest on a spot that is within one club-length of where it first touched the ground when dropped, but on the line marking a red penalty area. You play the ball from where it came to rest. How many penalty strokes do you get, if any?

47 / 170 correct responses

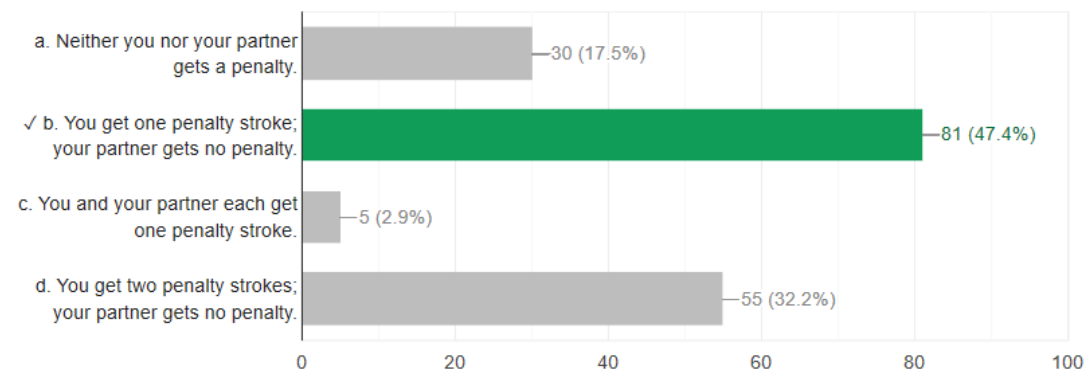

16. Your tee shot comes to rest in a yellow penalty area. You decide to take back-on-the-line relief and visually select a reference point on the reference line. Before dropping a ball to take relief, you replace a divot into a divot hole that is also on the reference line and about a foot behind the reference point you selected. You then drop a ball in the right way and it first touches the course about a foot behind the replaced divot but then rolls forward two club-lengths. You walk forward to get your ball to drop a second time and on your way back you notice the turtle is slowly walking toward your relief area. Not wanting to disturb the turtle, you decide to select a different reference point on the reference line about 10 yards closer to the hole. You drop your ball in the right way and it comes to rest in the relief area and you make the stroke. Which one of the following is true?

53 / 170 correct responses

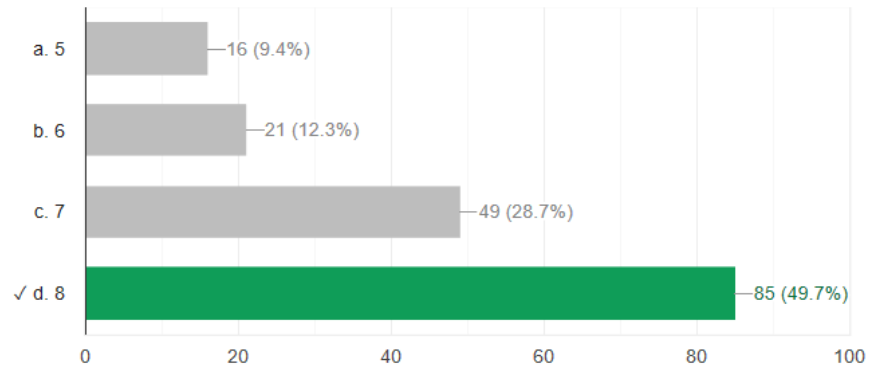

10. You make a stroke from the 10th tee and return to the half-way house to grab a couple of to-go lunches for you and your partner who are playing in a Four-Ball stroke-play competition. Your partner finds your ball in a red penalty area, and because your group is slightly behind pace, he decides to take lateral relief for you under Rule 17.1b. He determines your relief area by using his driver that happens to be a couple of inches longer than yours. To ensure the ball is dropped as far from the penalty area as possible, he drops a ball in the right way, at the outer edge of the relief area. The ball bounces out of the relief area but then rolls and comes to rest back in the relief area. He proceeds to the other side of the fairway and as you arrive at your ball, he makes his stroke to the green. Being completely unaware of what has transpired, you play your ball as it lies and it comes to rest on the green. Which one of the following is true?

81 / 171 correct responses

18. In stroke play, your second shot comes to rest in the general area amongst a pile of rocks near the putting green and you decide to take unplayable ball relief. When measuring under the lateral relief option, part of the two club-length relief area is on the putting green. You drop a ball in the part of the relief area that is on the putting green. It rolls to a different part of the relief area and comes to rest on the fringe, overhanging but not touching the surface of the putting green. You putt from there and take two more putts to finish the hole. What is your score for the hole?

85 / 171 correct responses

8. True or False: When you are required or allowed to take stroke-and-distance relief, your relief area may include more than one area of the course.

136 / 182 correct responses
